Steps/Criteria/Policies for Releases after First Major Release

Status	RESOLVED
Outcome	Approved
Minutes Link	2019 09 05 TSC Minutes

Overview of Proposal

See Project Lifecycle Task Force Issue 3

Formal Proposal(s)

All major releases must fulfill the same requirements as those for the First Major Release, in accordance with SemVer.

All releases (both major and minor) should document how an upgrade can be deployed.

For major releases where there is a breaking change or minor releases that add new functionality, documentation to migrate from the previous minor version of the previous major version should be provided.
