- aries-mediator-service – a DIDComm Mediator in a Box
    - working on Pickup support
- aries-endorser-server – an Indy Endorser in a Box (in development)
- Aries-Toolbox
- Aries-SDK-Java
- Ursa (https://www.hyperledger.org/use/hyperledger-ursa, https://github.com/hyperledger/ursa)

Discussion Topics

- Minor Versions - PR 752 - agreement to merge this - need approval and announcement on Discord to confirm.
- Can We Close This?
    - #745, #737, #736 Push Notification PRs (need the right people)
    - #727 An Ack (RFC 0015) can't be a FAIL message
- Request for help – Wrap the Aries RFC repo in a Static Site Generator and publish to be a more useful resource. At minimum, we need guidance about how the protocols should be used for those new to the community.
    - Another future discussion.
- DIDComm v2 Adoption?
    - Where are we?
    - What would help?
    - Comments welcome on spreadsheet for important DIDComm v2 considerations/attributes
    - Discussion welcome in the discord channel

Other Business

Future Topics'

- State-of-union of Aries projects
- OIDC Credential Exchange in Aries - Mike Richardson
- decorator for redirection after proofs. - existing?
- Standardized attribute names for AnonCreds - alignment with VC data model. (Paul Bastian)
    - terms and conditions (as link)
    - machine-readable governance?
- Multiple sigs on a credential - Shivam Sethi
