

18:07:22 From Alex Howard : Indicator is a conclusion of the experiment whereas the parameter is the basis of comparison of two or more variables. A parameter can be manipulated in an experiment to obtain a desired indicator whereas an indicator cannot be manipulated but it can be influenced by the condition of the experiment.

18:17:28 From Alfonso Govela : google says....

18:19:39 From Alfonso Govela : Cambridge Dictionary says: @something that shows what a situation is like:

indicator of Commodity prices can be a useful indicator of inflation, he claimed.

an economic indicator”

18:32:41 From Alfonso Govela : What is the difference between an indicator and a variable?

Variables are properties or characteristics of the concept (e.g., performance at school), while indicators are ways of measuring or quantifying variables (e.g., yearly grade reports). The process of turning abstract concepts into measurable variables and indicators is called operationalization.
