

The images below (not yet purchased) represent inclusion. My thought is to take terms we regularly use related to coding, Agile development, and business; and redefine them as captions for the images.

Examples:

```
$ cargo run
    Running `target/debug/inclusion`
Hello, world! I love to code!
```

Term: Extreme Coding

Definition: Partners with new Perspectives and

```
public class MyCommitment {
    static void myCivility() {
        System.out.println("Diversity and Inclusion!");
    }
    public static void main(String[] args) {
        myCivility();
    }
}
```

MVP = Minimum Viable Product

NPV = Net Present Value

DCI = Diversity, Civility, Inclusion
