# The Test Layout

See <https://testnet.diva.exchange/ui/peers-domains-roles>

7 (n1-n7) local nodes (available on the LAN), 2-N (nx2 - nxN) remote nodes (available over the WAN/over I2P to be more precise). All on Iroha 1.2.x.

Tests running since December 03, 2020.

n1-n7 stable UNTIL one of the remote nodes goes away (like loosing network connectivity, which is reasonable anytime).
