

HYPERLEDGER Healthcare SPECIAL INTEREST GROUP

Hyperledger is a non-profit consortium of the Linux Foundation, advancing enterprise-grade business blockchain technologies through open source, open community collaboration

HC-SIG General Meeting Guest Presentation

Patrick Joyce, Chief Scientific Officer at ResearchHub

March 17th, 2021
1000 - 1100 Eastern

ResearchHub is a Reddit-style forum where users are rewarded with ResearchCoin (RSC) for sharing, curating, and discussing academic research. Their mission is to accelerate the pace of scientific research by creating new incentives which encourage academic science to operate more like open-source software development. Patrick will be demoing and discussing how he reimburses medical research outside of the PhD track as well as reviewing his findings from their recent ResearchCoin Giveaway
