

# Week 10 Slide

Han Xu

# What I accomplished this week

1. Responded to all feedback from Peter for my 2nd PR  
(<https://github.com/hyperledger/cactus/pull/1183>)

(Thank you Peter for doing tweak for me and also public Iroha AIO image)

2. Look into the pending transaction

# Technical Questions

## 1. Healthcheck plan

Embed a python library inside the Iroha image.

Do a query of get Account?

See whether contains “admin@test” string?

# General Question

1. N/A

# Questions for me

Critique is welcomed!

# Expectation of the coming Week (Week 11)

1. Changing magical strings to enums (this weekend)
2. Tweak Python healthcheck
3. PR: update the connector PR to reflect the published image version
4. Make sure to pass the tests
5. Request and response interface
6. Publish all ports to Iroha and do it in a similar way as Peter did so that Iroha test ledger could take in an arbitrary port as input

# Plan for Week 112

Try to embed the pending transaction?

Thank you!
