

Week 9 Slide

Han Xu

What I accomplished this week

1. Finished rebasing the second time
2. Drafted pull request with Peter; fixed most feedback from Peter (11/12)
3. Finished my own Dockerfile; shrunk the size to 120MB; 85% improvement (thanks the Iroha community and Greg for their help)
4. Delivered presentation to the Iroha community this morning
5. Explored the issue behind grpc error “GOAWAY unavailable” (get pending transaction)

total reclaimed space: 40.00MB

```
han@han-ubuntu:~/workspace/iroha_docker$ docker images | grep 1.20f
```

```
hanxyz/iroha
```

```
1.20f
```

```

```
120MB
```

```
han@han-ubuntu:~/workspace/iroha_docker$ █
```

Technical Questions

1. “error Command failed with exit code 1”, which failed 2 out of 3 CI workflows
2. Possible solution for grpc error “GOAWAY unavailable” (generate pending transaction)
 - > embed a python script to generate pending transaction
 - > use iroha ledger to run the python script

✓ **Cactus CI Github Workflow**  2
on: pull_request

✗ build (ubuntu-20.04, v12.22.3, f...

✗ build (ubuntu-20.04, v14.15.1, f...

✓ build (ubuntu-20.04, v16.2.0, fal...

General Question

1. Next step? (docker image PR; rebasing mistakes; testnet; request interface; healthcheck)

Questions for me

Critique is welcomed!

Expectation of Coming Week (Week 10)

Thank you!
