

Global Scouting of DLT / Blockchain Educational Opportunities

Mentorship Project of Linux Foundation at
Learning Materials and Development Working Group

June 2021

Why do this Project?

Learning about DLT and Blockchain is difficult.

There are overwhelming amounts of unorganized information scattered across the web.

We will get to grow a unique community of learners.

Newcomers to DLT and Blockchain will have a great tool to learn quickly.

Barriers to entry for DLT will lower.

We will create an effervescent Learning Initiative.

Our Plan

Survey

Will help gather human feedback

Community

Will review and give continuous feedback

Automation

Will help enumerate digital resources

Knowledge Graph

Will represent our Learning Ecosystem in a Graph Database

Community

Will validate and filter a Taxonomy of Learning

What we will Achieve

A Thriving Community

Diverse & Interested in Curation of Learning Resources for DLT

A Knowledge Graph

A Visualized Graph Database, which will help in navigating the taxonomy

A Global Directory

With a detailed Taxonomy for Learning Resources

CALL TO ACTION

Answer the Survey.

Contribute to Taxonomy.

Contribute to the continuous development of
Knowledge Graph and Global Directory.

Help us curate the results.
