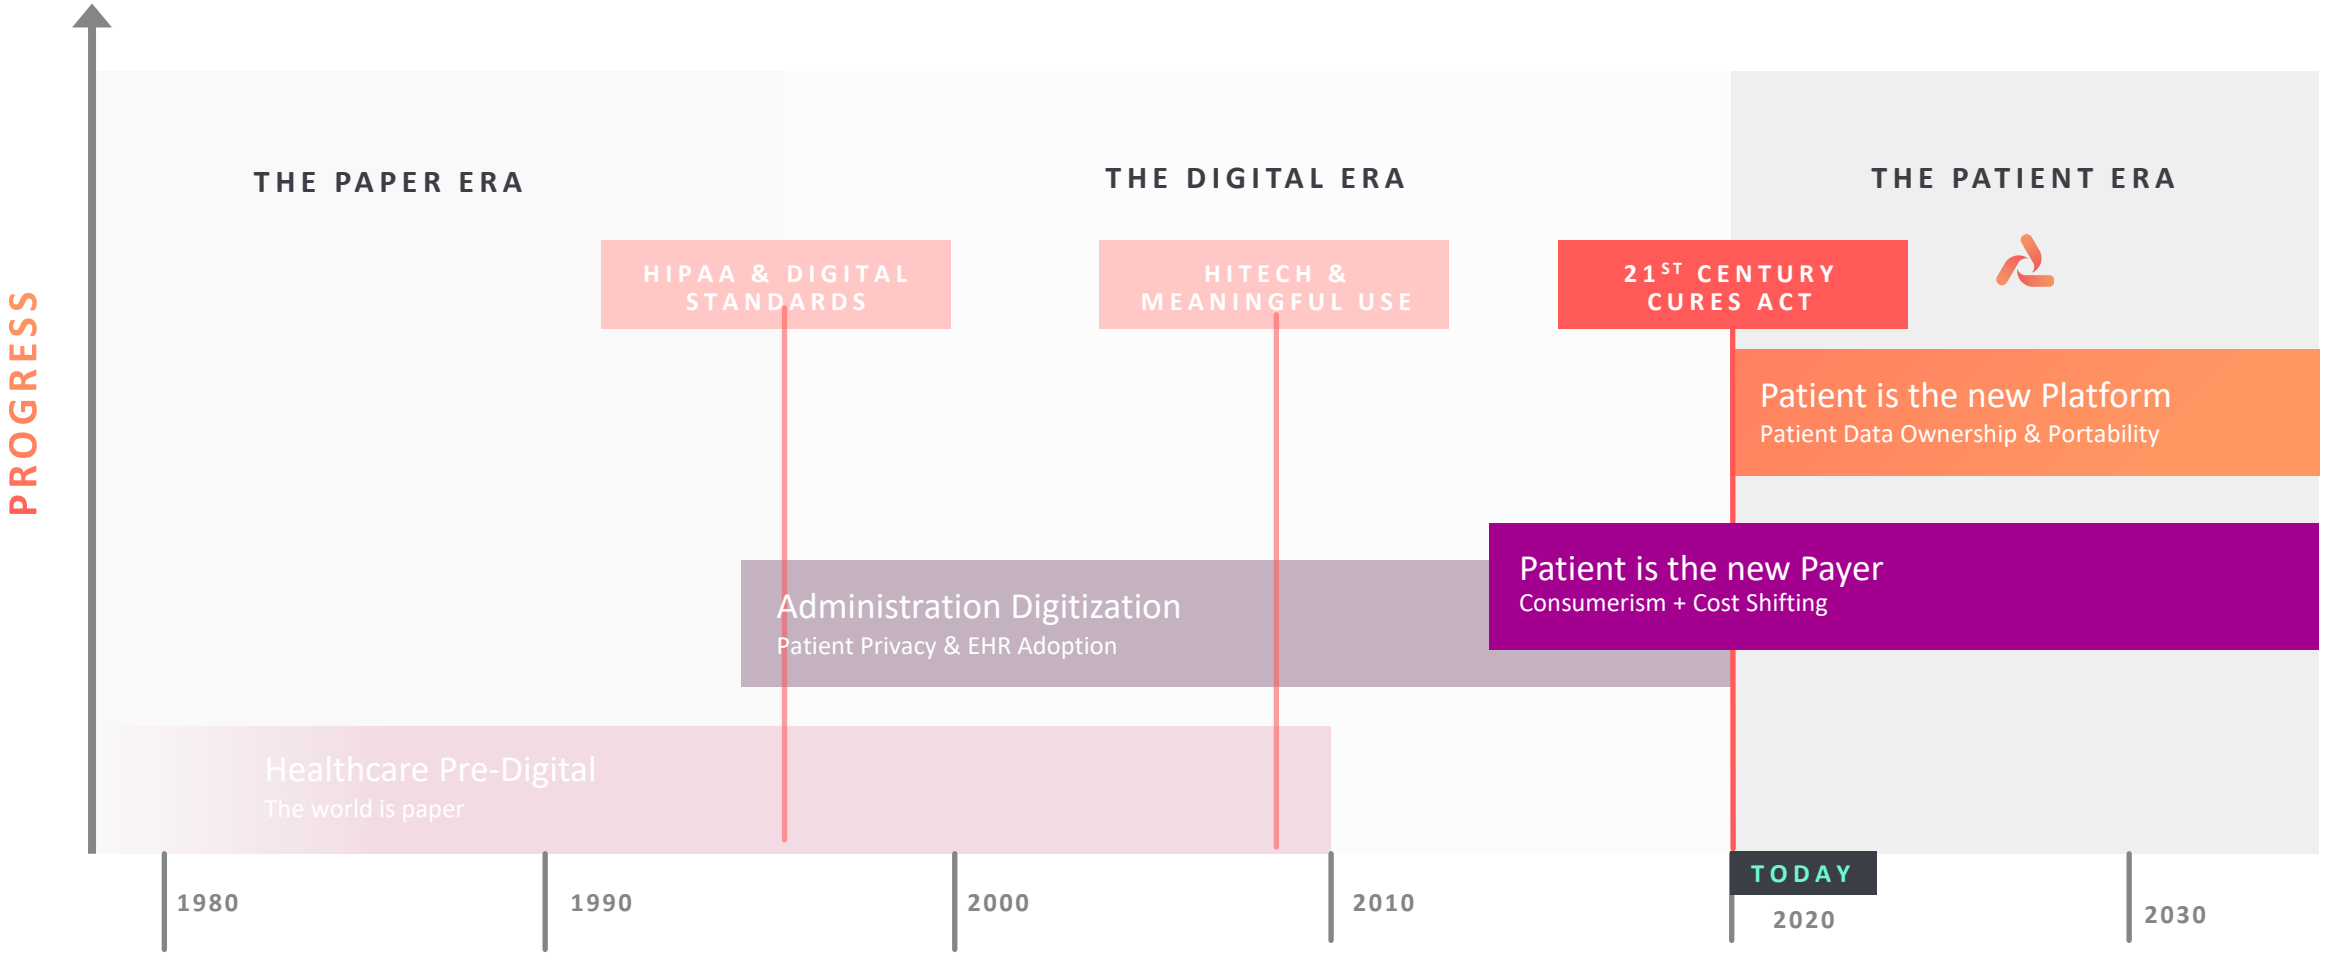
Healthcare & technology working as one.

FEBRUARY 2021 OVERVIEW

Industry Shifts are Driven By Innovation + Regulation

A SHIFT IS HERE



WHY DOES THIS MATTER?

This will change the role patients play in healthcare.

Welcome to the **patient era**.

What are verifiable credentials (VCs) & why is this important?

- VCs are the electronic equivalent of the physical credentials that we all use today: passports, driving licenses, birth certificates etc… You can then carry these with you on your smart phone

We get a **trusted digital passport** that can be used to verify our identity on-line.

- This information is created in such a way that it allows organizations to verify authenticity just by scanning your phone.
- This decentralized model of control gives full authority and flexibility to each person who holds their digital identity
- By moving to cryptographically- verifiable digital credentials, we can finally start proving our identity, attributes, or relationships without intermediaries

The Verifiable Credential “Trust Triangle”

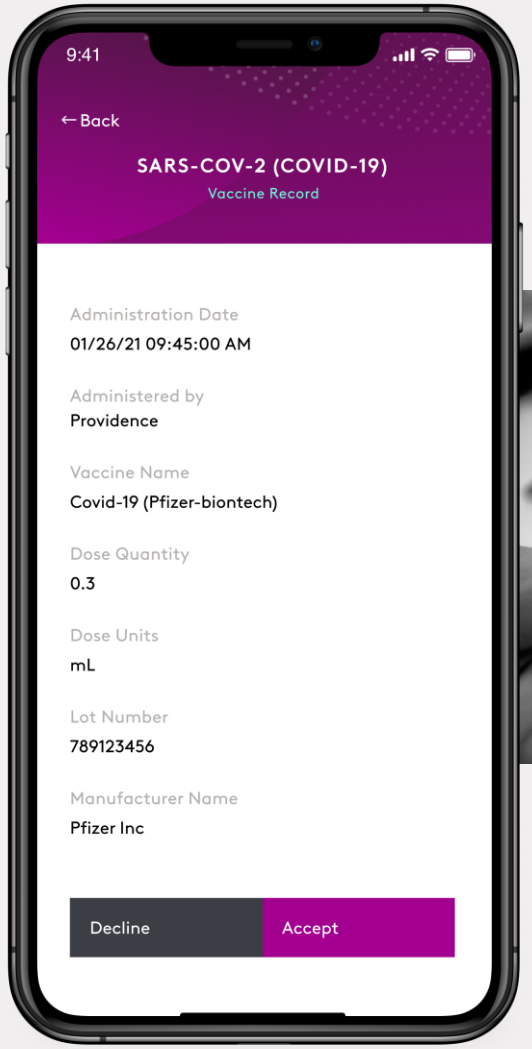
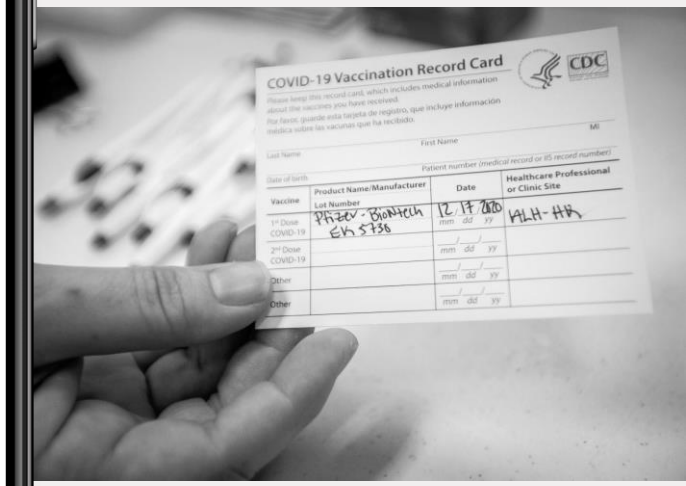
FOR HEALTH SYSTEMS, PROVIDERS, & PHARMACIES

Convenience for Patients & Caregivers

Provide patients with the convenience of a trusted, digital COVID-19 vaccine card that they can take with them on their smartphone.

Integration-Less | **EHR Integration**





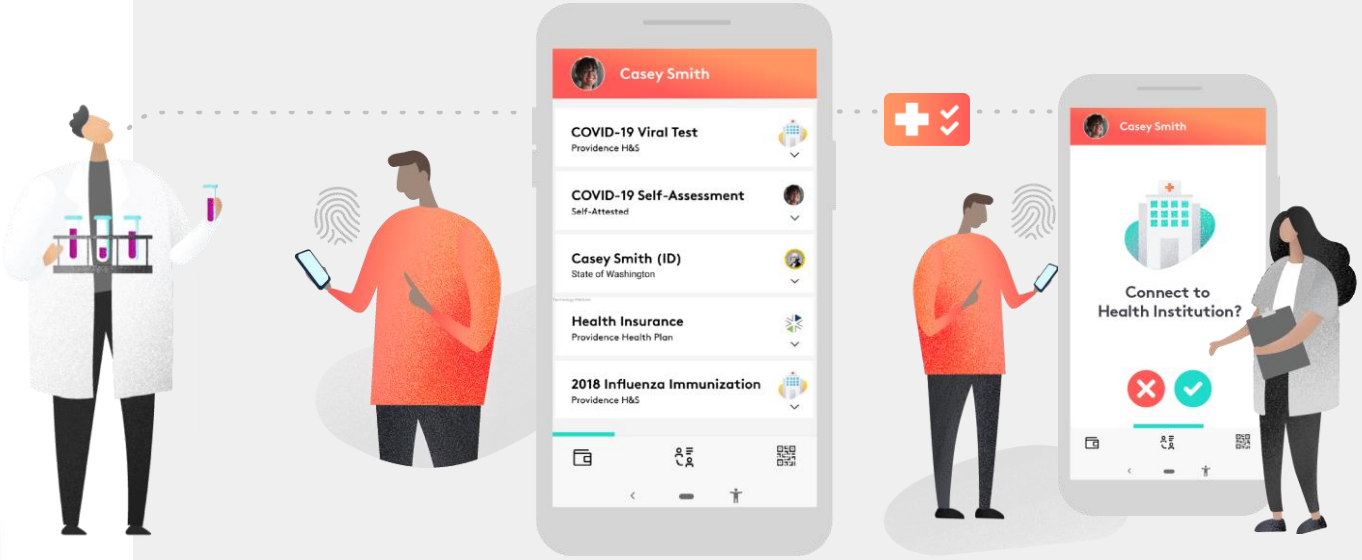
OPEN STANDARDS & GOVERNANCE FOR HEALTHCARE INTEROPERABILITY

The Exchange is leading the industry by developing the standards for verifiable credentials

AN OPEN COMMUNITY

Lumedic

The Lumedic Exchange is a community of diverse organizations taking on healthcare interoperability by thinking differently about the “Patients As The Source:” enabling the exchange of their own personal health information to drive the creation of new Use Cases for Empowered Patient Transformation



Exchange Workgroups

- Physician Credentialing
- Registration
- Digital Identity
- COVID-19 & Public Health
- Lab Test Results
- Pharmacy/PBM
- Equity & Inclusion
- Skilled Nursing Facilities (SNF)
- Technical Work Group (TWG)
  - ✓ Schema development

Meeting Cadence to be established by participants – coordinated by Lumedic

Join the Exchange Community

We welcome you to join the largest layer 4 eco-system focused on healthcare and VC

A unique collaborative community that's shaking up the industry around moving digital credentials

CHOICE. CONTROL. TRANSPARENCY
