17:26:54        From  Alfonso Govela : I am working with IWA-TTF, InterWork Alliance Token
Taxonomy Framework for Learning Tokens, another Hyperledger Project. We have here enough
material to launch a Hyperledger Taxonomy Framework for Climate Action and Accounting to
present, explain, use, and evolve our Ontology. This could become a Hyperledger Lab and a working
space for further continuous refinement

17:50:20        From  Alfonso Govela : Have to leave. Would like to propose a way to communicate
