17:02:49 From Kyle Robinson to Everyone:

  https://github.com/bcgov/bc-vcpedia/blob/main/credentials/credential-bc-ghg-emissions-verification.md

17:16:02 From Alex Ivan Howard to Everyone:

  I also wanted to ask that :)

17:22:57 From Elisabeth Green Tongva land she/her to Everyone:

  Here is a solution to that problem and also a way to save the corporation from paying for a 3rd party verification. Just require that the corporation attribute the emissions to its living agents, and allocate the emissions the way I specify at http://green247.org/carbon.htm

17:26:35 From Elisabeth Green Tongva land she/her to Everyone:

  So, the role is a placemarker until the agent actually performs the activity?

17:28:10 From Elisabeth Green Tongva land she/her to Everyone:

  role = responsibility?

17:30:40 From Kyle Robinson to Everyone:

  Sorry, I have to drop off, thanks all

17:30:48 From Alfonso Govela to Everyone:

  role "the function assumed or part played by a person or thing in a particular situation."

17:32:16 From Alfonso Govela to Everyone:

  role "the position or purpose that someone or something has in a situation, organization, society, or relationship"

17:36:04 From Elisabeth Green Tongva land she/her to Everyone:

  x = agent; r = f(x) = role; a = activity; a = f(r)

17:38:38 From Alfonso Govela to Everyone:

  roles restrict the set of activities

17:44:13 From Alex Ivan Howard to Everyone:

  Suggested rephrase of Alfonso's comment:

  "A role restrict the set of activities that an agent can perform in the context within which they enact the role."

17:44:36 From Alex Ivan Howard to Everyone:

  *restricts, not "restrict, sorry

17:44:51 From Alex Ivan Howard to Everyone:

  "A role restricts the set of activities that an agent can perform in the context within which they enact the role."

17:48:45 From Elisabeth Green Tongva land she/her to Everyone:

only individuals should have the right to pollute and only within a specified quota. The verifier certifies whether the individual exceeded the quota. The validator certifies that the verifier used the procedure in its certification.

17:50:00 From Alfonso Govela to Everyone:

I have to leave at 10 min to the hour. Apologies. I shall review again the notes. Thank you all. Best
