Have to leave. Bye Everybody

17:45:22 From Junji Katto to Everyone:

For electrode: the Interwork Alliance consortium has created a protocol that implements some guidelines on MRV using a blockchain taxonomy that could be interesting for you: https://interwork.org/wp-content/uploads/2021/05/Voluntary_Ecological_Markets_Overview_Revised.pdf

17:56:48 From Kyle Robinson to Everyone:

Thanks for sharing the InterWork Alliance document. Regarding data standards, I noticed there's a reference to the GHG Protocol for emissions reporting. This is great to see. We are very interested in a standard method for reporting to allow for interoperability.

18:01:02 From Andrii - 482.solutions to Everyone:

Also, we make some research in Hyperledger-labs initiative "Fabric Smart Client" and 'Token SDK" repositories

18:02:34 From Andrii - 482.solutions to Everyone:

but for now, looks like it was lack of documentation to working with it ^. (so for now - we wait for some grew-up and update's there)
