Daily Pair Programming Calls

How to Join

1. Join the Hyperledger Foundation Discord Server: https://discord.gg/invite/hyperledger (10 AM Pacific Time)
2. Locate the channel category called Cacti
3. Within that category, locate the voice channel called general as seen on the screenshot below.
4. If your microphone doesn't work or for whatever reason you cannot do a voice call, just post your question on the chat instead and make sure to tag the group called @Cacti Maintainer in your message so that the maintainers (who are most likely to know the answer to your question) get a notification about the message!
