

Performance and Scale Working Group

Description	<p>Performance and scalability are two key characteristics of any platform. In terms of most of the Hyperledger projects, both will directly relate to end user satisfaction and ultimately adoption of a project. For instance, if a code base consumes too many system resources or does not complete an action in a reasonable time with respect to other solutions, it may not succeed. Similarly, if a product does not scale well (horizontally and or vertically), it may not succeed.</p> <p>The purpose of the Performance and Scalability Working Group (PSWG) is to discuss, research, and identify key metrics that relate to the performance and scalability of a blockchain and blockchain related technologies.</p>

TSC Working Group Updates

- [September 2018](#)
- [June 2018](#)
- [April 2018](#)

[New TSC Working Group Update](#)

Charter

Please see [Charter](#) for the full text of the charter.

Scope

PSWG serves as a cross project forum for architects and technologists from the Distributed Ledger Technology (DLT) community to exchange ideas and explore the performance and scalability aspects of the DLT projects. PSWG will help review incoming performance project proposals and make recommendations to the TSC. The PSWG may work with the other working groups, especially in the areas of architecture and requirements.

Meetings

All Hyperledger meetings are run covered by the following [Antitrust Policy](#).

The Performance and Scale Working Group meets weekly on Tuesdays at 9:00 AM US /Eastern time. See the [Calendar of Public Meetings](#) for the next meeting and dial in details.
