

Hyperledger Fabric Roadmap

The roadmap can be viewed on the [Jira project dashboard](#).

Discussion for Fabric releases happens on the [#fabric-release](#) channel in chat.

See [prior release notes](#) for release history and content. Prior release documentation can be found in the [documentation links](#).

Beginning with the 1.2.0 release, the Fabric maintainers plan on publishing quarterly, focused releases that target a small number of themes for improvements and new features.

We maintain a [JIRA release dashboard](#) for the upcoming release. The top left gadget on the dashboard indicates which Epics are currently in progress for the upcoming release.
