

Meeting Agenda

Wednesday, August 21st 2019

- Discuss 0.3 Release
 - truffle support and work for it
 - contract to contract invocation
 - motivated by feedback from users.
- ongoing/new work
 - asynchronous events / event watching in fab3
 - consolidate evmcc code and fabric and separate their respective dependencies
 - motivated by being able to package the evmcc more easily using the SDKs
 - update dependencies
 - burrow 0.27 with wasm support
 - dep 0.5.4
 - anything else?
- future work
 - suggestions?
- Please give feedback on new changes in rocketchat fabric-chaincode-evm
- Meeting Recording: [HyperledgerFabricChaincodeEVMCommunityMeeting-2019-08-21.m4a](#)

Wednesday, July 17th 2019

- No meeting. Swetha & Morgan are traveling and cannot make the meeting time.
- 3 changes submitted for truffle support.
- Downstream truffle changes by truffle folks to support EVM-chaincode.
- Announce later.

Wednesday, June 19th 2019

Intro / New Faces

Outstanding Changes Needing Review

Discussion Topics

1. Restructuring of EVMCC to separate EVMCC code from Fab3 as well as dependencies
2. Current status / attention of Swetha & Morgan.
3. minimal changes for basic truffle E2E
 - a. 2 small changes, one more involved change that conflicts with #1, restructuring
 - b. <https://github.com/swetharepakula/fabric-chaincode-evm/tree/truffle-wip>
4. Anything Else
5. fabtoken info - delayed from 2.0
6. evm gas limit hit by some users
 - a. should make a Jira for this
 - b. make it stored on the chaincode, use a transaction to change the value, thus all users of an instance must agree, etc
7. Burrow v0.26.2 release
 - a. mentions a bug that has been fixed in the evm.
