

# Hyperledger Indy

<b>Project</b>	
<b>Status</b>	ACTIVE
<b>CII Badge</b>	
<b>Description</b>	Distributed ledger purpose-built for decentralized identity

Hyperledger Indy provides tools, libraries, and reusable components for providing digital identities rooted on blockchains or other distributed ledgers so that they are interoperable across administrative domains, applications, and any other silo.

Indy is in active development across the following areas:

## Distributed Ledger

- [indy-node](#)
- [indy-plenum](#)

## Client Tools

*Note: We are in the process of moving our Client Tools work to [Hyperledger Aries](#). We recommend engaging with both communities for the time being if you interested in building applications on top of an Indy network.*

- [indy-sdk](#)
- [indy-agent](#) (superseded by [project aries](#))

## Shared Components

- [indy-hipe](#)
- [ursa](#)

## Key Characteristics

- Distributed ledger purpose-built for decentralized identity
- Correlation-resistant by design
- DIDs (Decentralized Identifiers) that are globally unique and resolvable (via a ledger) without requiring any centralized resolution authority
- Pairwise Identifiers create secure, 1:1 relationships between any two entities
- [Verifiable Credentials](#) in an interoperable format for exchange of digital identity attributes and relationships, currently in the standardization pipeline at the W3C
- Zero Knowledge Proofs which prove that some or all of the data in a set of Claims is true without revealing any additional information, including the identity of the Prover

## Documentation

- An index of Indy documentation can be [found here](#).
- The documentation of the nitty gritty of the underpinnings of the code is located in the "docs" folder of each repo.
- **Note:** Indy Documentation is in the process of migrating to: [indy.readthedocs.io](#)

## Project Management

- Bugs, stories, and backlog for Indy Node (Ledger): <https://jira.Hyperledger.org/projects/INDY>
- Bugs, stories and backlog for Indy SDK: <https://jira.Hyperledger.org/projects/IS>
- Bugs, stories and backlog for reference Indy Agents: <https://jira.Hyperledger.org/projects/IA>

- A roadmap showing what the various teams are working on: [Indy Roadmap](#)
- Production deployments of Hyperledger Indy are listed: [Indy Deployments](#)
- Guidelines for reporting issues and working on issues: [How to Contribute](#)

#### Repositories

- <https://github.com/Hyperledger/indy-node>
- <https://github.com/Hyperledger/indy-plenum>
- <https://github.com/Hyperledger/indy-sdk>
- <https://github.com/Hyperledger/indy-agent>

#### Communication

##### Mailing List

Sign up for the [Hyperledger Indy Mailing List here](#)

Chat (for questions and ephemeral discussions)

##### General Discussion

- [#indy](#): questions and discussion about stable releases.
- [#indy-outreach](#) : documentation improvements and efforts to invite and onboard contributors to the community.

##### Discussion about new development

- [#indy-node](#): discussions about the distributed ledger.
- [#indy-sdk](#): client library that allows identity agents to talk to the distributed ledger.
- [#indy-pr-review](#): maintainer coordination and discussion.
- [#indy-contributors](#): maintainer coordination and discussion.
- [#indy-semantic](#): discussion on terminology and roles.

## Meetings

### Identity WG Implementors Call

This is the call to discuss how to leverage Indy within your identity solution. More information is on the page [Identity WG Implementors Call](#)

### Indy Contributors Call

People who want to contribute to Indy should join this call. This does not replace our asynchronous collaboration, but should help us keep everyone up-to-date and moving together.

Calls happen every other week, and rotate between two timezones

- Europe afternoon / US morning: Monday at 8AM Los Angeles, 11AM New York, 4PM London, 18H Moscow
- US afternoon / Asia-Pacific morning: Monday at 3PM Los Angeles, 6PM New York, Tuesday at 6H Beijing, 8AM Sydney.

Location: <https://zoom.us/j/615818107>

Discussion items: upcoming releases, current PRs, work that will generate future PRs, architecture changes that will impact downstream teams, project standards, best practices, design, etc.

Agendas: [Indy Contributors Meeting](#)

You can work with us between calls on the [#indy-contributors](#) channel on Rocket Chat.

#### Calendars

- Add any recurring Indy events to your calendar by navigating to our [public calendar](#) and clicking on the specific events to add them to your own Google calendar.
- [Hyperledger Calendar of Public Meetings](#)

#### History

- [Proposed](#) by Steve Fulling and Phil Windley, Sovrin Foundation and Nathan George and Jason Law, Evernym - [Slide Deck](#)
- [Approved](#) by the TSC on 2017-03-30
- [Proposed moving from Incubating to Active Status](#), [Approved](#) by the TSC on 2019-03-28
- TSC Updates: [TSC Project Updates](#)
- Historical updates: [TSC Project Updates pre-2019](#)
