The purpose of the Identity Working Group is to discuss, research, and document ways to capture, store, transmit and use Identities on the DLT, specifically for the projects in the Hyperledger greenhouse. The Identities can be of nodes that participate in the running of the DLT or entities that transact on the DLT.

## Charter

Link to the [charter](#).

## Scope

The scope is limited to the various lifecycle events and use of Identity needed to securely participate in the Hyperledger Project DLT implementations. The group will focus on the functional details first, and subsequently work towards a reference implementation.

## Meetings

All Hyperledger meetings are covered by the [Antitrust Policy](#).

This working group hosts two meetings. See the [Calendar of Public Meetings](#) for the next meeting and dial in details.

The main meeting is a teleconference bi-weekly on Wednesdays at 9 AM Pacific, alternating with the Architecture WG meetings. The zoom channel is <https://zoom.us/my/hyperledgercommunity>

The secondary meeting is the [Identity WG Implementers Call](#).

- [September 2018](#)
- [June 2018](#)
- [March 2018](#)

[New TSC Working Group Update](#)

## How to Get Involved

The working group calls have presentations from the coalface of Identity related work happening globally and healthy discussions around it. All interested people are welcome and we ask that you introduce yourself including why you are on the call and how you can help.

We are working on an [Identity WG Paper draft](#). Any contributions to this are also welcome.

## Communication Channels

These are the mechanisms that this working group uses to communicate.
