Identity Working Group

Description
The purpose of the Identity Working Group is to discuss, research, and document ways to capture, store, transmit and use Identities on the DLT, specifically for the projects in the Hyperledger greenhouse. The Identities can be of nodes that participate in the running of the DLT or entities that transact on the DLT.

Charter
Link to the charter.

Scope
The scope is limited to the various lifecycle events and use of Identity needed to securely participate in the Hyperledger Project DLT implementations. The group will focus on the functional details first, and subsequently work towards a reference implementation.

Meetings
All Hyperledger meetings are covered by the Antitrust Policy.

This working group hosts two meetings. See the Calendar of Public Meetings for the next meeting and dial in details.

The main meeting is a teleconference bi-weekly on Wednesdays at 9 AM Pacific, alternating with the Architecture WG meetings. The zoom channel is https://zoom.us/my/hyperledger.community

The secondary meeting is the Identity WG Implementers Call.

Communication Channels
These are the mechanisms that this working group uses to communicate.
