Hyperledger Explorer

# Project

**Status**

INCUBATION

**CII Badge**

Description

Blockchain Web UI

Hyperledger Explorer aims to create a user friendly web application for Hyperledger to view/query blocks, transactions and associated data, network information (name, status, list of nodes), chain codes/transaction families (view/invoke/deploy/query) and any other relevant information stored in the ledger.

## Key Characteristics

## Documentation

Current project proposal is available as a [Google Doc](#).

## Project Management

## Repositories

Explorer uses Gerrit. There is a [mirror on GitHub](#).

## License Scans
Communication

Mailing List
- explorer

Chat (for questions and ephemeral discussions)
- #hyperledger-explorer - General usage questions
- #hlexplorer-developers - Contributor discussions

Meeting
We discuss sprint items via email and rocketchat and JIRA due to demographic challenges in finding agreeable meeting times.

History
- Proposed by Christopher Ferris (IBM), Dan Middleton (Intel) and Pardha Vishnumolakala (DTCC)
- Approved by the TSC on August 11, 2016
