CII Badge | 
Description | Distributed ledger in Go

Hyperledger Fabric is an enterprise-grade permissioned distributed ledger framework for developing solutions and applications. Its modular and versatile design satisfies a broad range of industry use cases. It offers a unique approach to consensus that enables performance at scale while preserving privacy.

**Key Characteristics**

High-performance, secure, permissioned blockchain network. Code written in Go, chaincode (smart contracts) in Go, Javascript, or Java, SDKs in Node.js, Java, Go, REST and Python.

**Development Roadmap**

- Hyperledger Fabric Release Roadmap
- Fabric Release Planning Dashboard

**Resources**

- Welcome to Hyperledger Fabric - Details on how to get started
- Main documentation
- Getting Started for application developers
- Contributing to Fabric and related sub-projects
- Coding Guidelines
- Design docs
- Meeting notes
- Videos on YouTube for Hyperledger Fabric. Includes informational and playbacks. Subscribe to be automatically notified when new videos are posted.
- Getting Started in CI - Debugging CI jobs failures

**Project Management**

- Jira Dashboard
- Jira Navigation will show you how to see the work in progress and track all issues.

**Repository**
Releases

- The Hyperledger Fabric Roadmap outlines the themes for the next two releases, and the specific feature JIRA items for the next release.
- Fabric Release Exit Criteria details our release checklist
- Fabric Release Process details the process for cutting a release
- Fabric Release history provides the list of releases
- Fabric Quality Assurance (QA) - Test Strategy, Test cases, and Reports

Meetings
• Discussions are conducted on the fabric@lists.hyperledger.org (see above) mailing list and in Rocket Chat, to allow for community-wide participation.
• Playbacks are conducted for contributors to show regular progress and get feedback from the community. Agenda and dates can be found here.
• Past meeting recordings can be found in the Hyperledger Fabric Meeting Recordings folder.
• There is a bi-weekly maintainers meeting every other Wednesday at 9 am ET held to review progress against a release and to do release planning and epic proposal reviews. Please consult the community calendar.

History

• Proposed by Christopher Ferris (IBM) and Tamas Blummer (DAH)
• Approved by the TSC on March 31, 2016
• Moved out of Incubation on March 2, 2017 - Request, TSC Approval
