Tools to Build Your Identity Application

Session Topic or Project
A crash course in building identity solutions using the tools supplied by Aries, Indy, and Ursa.

Session Leader
Nemanja Patrnogic, Software Developer, Evernym

Time Slots and Spaces
Part of the Identity Projects workshop.

Experience Level of Participants
Beginner

Session Language
Formal content will be English, but we will have speakers of Russian and Serbian available to assist.

Programming Language(s)
- C / C++
- Go
- Java
- Javascript
- Python
- Rust
- Other

Other Prerequisites
None

The Plan
A crash course in building identity solutions using the tools supplied by Aries, Indy, and Ursa. We'll go over the existing libraries and explain the purpose for each of them. In the end we'll also show a demo of what can be built using this technology.

The Goals
- Attendees will understand the features offered by each Hyperledger Identity project.
- Attendees will see how the tools offered by these projects can help them create their solutions.

Software to Install Before
None

Special Equipment Required
Power, projector, and screen.
