Hyperledger Explorer aims to create a user friendly web application for Hyperledger to view/query blocks, transactions and associated data, network information (name, status, list of nodes), chain codes/transaction families (view/invoke/deploy/query) and any other relevant information stored in the ledger.

Key Characteristics

Documentation

Current project proposal is available as a Google Doc.

Project Management

Repositories

Explorer uses Gerrit. There is a mirror on GitHub.

Explorer links:

1. Wiki page
2. Hyperledger Explorer
3. CII Best Practices Badge
4. Read the docs

8. Rocket Chat
9. Azure Pipeline

License Scans
Communication

Mailing List
- explorer

Chat (for questions and ephemeral discussions)
- #hyperledger-explorer - General usage questions
- #hlexplorer-developers - Contributor discussions

Meeting
We discuss sprint items via email and rocketchat and JIRA due to demographic challenges in finding agreeable meeting times.

History
- Proposed by Christopher Ferris (IBM), Dan Middleton (Intel) and Pardha Vishnumolakala (DTCC)
- Approved by the TSC on August 11, 2016
