Hyperledger Cactus Home

Hyperledger Cactus is a new approach to the blockchain interoperability problem. Hyperledger Cactus is currently undergoing a major refactoring effort to enable the desired to-be architecture which will enable plug-in based collaborative development to increase the breadth of use cases & Ledgers supported.

For a better understanding of where Hyperledger Cactus is heading please see the Whitepaper and Design Principles below!

Key Characteristics

Hyperledger Cactus aims to provide Decentralized, Secure and Adaptable Integration between Blockchain Networks.

Documentation

- Whitepaper
- Original Design Principles Google Doc

Project Management

Hyperledger Cactus uses GitHub Issues to track work items.

Repositories

Hyperledger Cactus uses GitHub for source code control.

- Main repo
