2020-09-02 Meeting Notes

1. PR Discussion
   a. Checking for zero keys and infinity signatures
   b. New PR for passing primes into CL signatures
2. Ursa in Javascript
   a. Cactus interested in using Ursa, but needs Ursa
   b. Mattrglobal uses our BBS+ signatures in Javascript from Ursa
   c. Neon-bindings is a great solution, according to Mike.
3. General discussion on Ursa bindings.
4. Discussion on post-quantum crypto.
5. Mike wants to submit big PR on accumulators—what is the best way to do this?
   a. Some discussion on accumulators
   b. Idea: start with basic interface, add in stuff from there.
