## Discussion items

Time	Item	Who	Notes
	Project Quarterly Report	<a href="#">Jonathan Hamilton</a>	<ul style="list-style-type: none"><li>• Q2 project report has to be filed a few days prior 25th of June.</li></ul>
5min	Git commit message compliance issues	<a href="#">Shingo Fujimoto</a> <a href="#">Peter Somogyvari</a>	Git commit message linting is troublesome for a lot of people so we need to address it head on.
40min	Project governance	<a href="#">Hart Montgomery</a> <a href="#">Shingo Fujimoto</a> <a href="#">Takuma Takeuchi</a> <a href="#">Clive Boulton</a> <a href="#">Jonathan Hamilton</a> <a href="#">Peter Somogyvari</a>	For larger changes: open an issue first  Maintainer's policy: We don't have strong feelings about it, everybody's happy to draw inspiration heavily from other project's such as Sawtooth. We aim to work with the native features of Github as much as possible.  Road-map to be as public as possible. We do not want to surprise people.  Peter to put together the initial draft of version v0.2 (the list of things we want in there)
10	Outreach	<a href="#">Hart Montgomery</a> <a href="#">Shingo Fujimoto</a> <a href="#">Takuma Takeuchi</a> <a href="#">Jonathan Hamilton</a> <a href="#">Peter Somogyvari</a>	All maintainers should get involved in their local meetups (virtual or otherwise) and evangelize the project.
5	Calendar, GMT time zone friendly contributor's call	<a href="#">Hart Montgomery</a> <a href="#">Shingo Fujimoto</a> <a href="#">Takuma Takeuchi</a> <a href="#">Jonathan Hamilton</a> <a href="#">Peter Somogyvari</a>	We decided that on-demand, topic driven meeting scheduling is the best approach so as to ensure that nobody wakes up or stays up late in vain for regularly scheduled calls that may or may not end up having attendance from the time zones that they are designated for.
