2020-05-14 Meeting notes

Date
14 May 2020

Meeting Overview
Presentation from Erik Valiquette on Canadian Blockchain Supply Chain Association (CBSCA). Erik is the co-founder and president of the CBSCA. Through its core services of advocacy and education, and the collaboration it promotes, the association brings together professionals who want to explore or are implementing blockchain in their supply chains. The member-driven association’s goal is to accelerate the adoption of distributed ledger technology, to help shape policy with governmental agencies to improve their services, and to enable the community’s voice to be heard. With a 30-year career in logistics, Erik is passionate about bridging the gap between technology and business needs and is a firm believer that blockchain has the potential to improve global supply chain management by reducing waste and enhancing security. Erik is based in Montreal, Canada.

Topics
- Quick intro
- Status of Blockchain in Canada's supply chain
- CBSCA services: Advocacy, Collaboration and Education
- What our community looks like
- Why join an Association
