Technical Working Group China

The Technical Working Group China (TWG China, or TWGC) is a bridge between the global Hyperledger community, and the emerging technical user and contributor community in China and the greater China region, including Hong Kong and Taiwan.

Please see Charter for the full text of the charter.

Three liaisons are appointed by Linux Foundation to help the work, including Donald Liu, Min Yu, and Scott Long.

Scope

The Technical Working Group China is responsible for growing the Hyperledger developer community in China by responding to new user questions, helping with first-level triage of community-reported bugs or other issues, helping demonstrate to new developers how to report bugs or fire pull requests, and pointing motivated developers towards the project roadmaps and development initiatives at the global Hyperledger web sites. It should also make sure to expose new users to the broad range of projects at Hyperledger.

Meetings

All Hyperledger meetings are run covered by the following Antitrust Policy.

Teleconference bi-weekly meetings on Wednesday 08~09 PM (GMT+8).

08~09

Welcome to join the next meeting using Tencent meeting. https://meeting.tencent.com/
