## Overview of Proposal

When HL got started we were very busy with fundamental governance questions and had the luxury of strong contributions taking place in the Architecture and other working groups. Now that HL has matured significantly, it makes sense to bring those technical discussions – that we in a sense outsourced to the working groups – back into the TSC.

A goal that we can aim towards with these discussions is something of a 2021 roadmap. There are a great many questions we can delve into. Here are a few that come to mind to get others generated...

- What functionality are we lacking across the portfolio?
- What are the most difficult maintenance issues affecting the projects?
- Can we articulate a list of tooling gaps?
- What are the biggest adoption obstacles for Hyperledger technologies?

Notes from Architecture Working Group:
