

Restructure the Greenhouse to avoid confusion

Overview of Proposal

The Hyperledger Greenhouse is confusing. There is a mix of projects that application developers (majority) want to use and core platform developers (minority) want to use. The large number of projects and their unobvious dependencies is confusing. The website is maintained by the Hyperledger staff but the TSC should help identify the main problems and can make suggestions on how to refactor the greenhouse.

Initial discussion on this topic can be found on the [Summary & RFC](#) page but will continue here.
