2019-12-18 Meeting notes

Date
18 Dec 2019

Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at http://www.linuxfoundation.org/antitrust-policy. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

Hyperledger is committed to creating a safe and welcoming community for all. For more information please visit our Code of Conduct: Hyperledger Code of Conduct.

Attendees

- David Fuelling
- Ian Simpson
- Vidya Kumar
- Neil Hartner
- Noah Kramer

Agenda

1. Introductions
2. Discuss open Quilt issues & PRs
3. Discuss STREAM PaymentResult
4. Q&A, misc issues

Goals

- Stakeholder sync-up.

| 15min | Discuss project issues                    | All             | • Discussed v1.0.3 issues here: https://github.com/hyperledger/quilt/issues?q=is%3Aissue+is%3Aopen+label%3Av1.0.3  
|       |                                           |                 | • https://github.com/hyperledger/quilt/issues/399                   |
|       |                                           |                 | • Created https://github.com/hyperledger/quilt/issues/406           |
| 15min | Stream `SendMoneyResult` enhancements?    | All             | • StreamSender caller may need to be able to check-in on a payment, but probably just a nice-to-have because most payments won't be very long. Probably a premature feature at this point.  
|       |                                           |                 | • One idea: Call sendMoney with some kind of callback which can update the caller.  
|       |                                           |                 | • gRPC endpoint needs to be able to tolerate disconnects. No changes to Quilt at this time.  |
