Hyperledger Fabric

Hyperledger Fabric is an enterprise-grade permissioned distributed ledger framework for developing solutions and applications. Its modular and versatile design satisfies a broad range of industry use cases. It offers a unique approach to consensus that enables performance at scale while preserving privacy.

Key Characteristics

- High-performance, secure, permissioned blockchain network. Code written in Go, chaincode (smart contracts) in Go, Javascript, or Java, SDKs in Node.js, Java, Go, REST and Python.

Resources

- Main documentation
- Getting Started for application developers
- Contributing to Fabric and related sub-projects
- Design docs
- Videos on YouTube for Hyperledger Fabric. Includes informational and playbacks. Subscribe to be automatically notified when new videos are posted.
- Getting Started in CI - Debugging CI jobs failures

Project Management

- GitHub board

Repository
• fabric GitHub repository
• Sub-project and related repositories

Releases

• The Hyperledger Fabric Roadmap outlines the next release themes.
• Fabric Release Exit Criteria details our release checklist
• Fabric Release history provides the list of releases

Links

• Documentation - extensive documentation, tutorials, reference, architectural concepts
• Stackoverflow Q&A

Communication

Mailing List

fabric@lists.hyperledger.org

• Subscribe
• Archives

Chat

Hyperledger uses Discord for communication purposes. Look for the following channels and several others:

• fabric
• fabric-code-contributors
• fabric-samples

Meetings

• Discussions are conducted on the fabric@lists.hyperledger.org (see above) mailing list and in Rocket Chat, to allow for community-wide participation.
• Contributor meetings occur every two weeks
• Past meeting recordings can be found in the Hyperledger Fabric Meeting Recordings folder.

History

• Proposed by Christopher Ferris (IBM) and Tamas Blummer (DAH)
• Approved by the TSC on March 31, 2016
• Moved out of Incubation on March 2, 2017 - Request, TSC Approval
