Learning Materials Development Working Group

The Learning Materials Development working group reports to the Hyperledger Technical Steering Committee. It is focused on developing open-source training material (licensed as specified by the Hyperledger Charter) to educate people interested in expanding their knowledge of Hyperledger and its projects. The working group will consult with other Hyperledger working groups, Hyperledger team members, and the project maintainers to identify training needs and develop strategies, as well as material to address those needs. The output of this working group will be targeted toward both technical and non-technical audiences.

Learning Materials Working Group Call Monday's 12 PM EST
Giving Chain Community calls Monday 11:30 am EDT
