2019-05-14 Meeting notes

Date

14 May 2019

Meeting Recording: https://drive.google.com/drive/folders/1NC8lshs00UA_iJ_FSNJOQQDvTxGDg40i

Attendees

- Karen Ottoni
- Bobbi Muscara
- Fabiano Franz
    - Matt Rosen
    - Adam Lambert
    - Fabiano Franz
    - Steve Magennis
    - Marc Liberati
    - Dre Bonifacio, SymPact Andres "Dre" Bonifacio
    - Scan Trust
    - Ric Shreves

Agenda

- How to **create an LFID and edit the Wiki–skipped to next call**
- **Survey**: Finalize proposed questions
- **Presentation**: Matt Rosen, Founder and CEO of TraceRx (www.tracerx.us) will present TraceRx's software platform empowering development agencies to combat supply chain losses. TraceRx delivers end to end track and traceability across the entire supply chain from manufacturer to the last mile at a granular level with our proprietary app, innovative dashboard, the accessibility of cloud computing and security of blockchain.
- **Miscellaneous**: Share any comments, ideas, announcements, upcoming events.

Meeting Notes

- We reviewed the remaining survey questions and suggested the following changes:
    - Add to Survey Q8

        "Best practice compilation for knowledge sharing in the blockchain for social good community"

        "For the SIG to be the thought leader in this space - produce white papers etcI'm here to further projects I'm personally working on"
- TraceRx Presentation, Matt Rosen CEO
    - Problem in developing countries: corruption prevents development assistance from reaching final destination "fox auditing the hen house"
    - 30% of product lost due to theft of inventory or unauthorized inventory destruction
    - Solution: TraceRx platform Fully integrated blockchain based track and trace system empowers customers to engage their supply chain
    - Dashboard allows customers to communicate with anyone in field, in supply chain, no matter how remote. Metrics change visually and dynamically, can be macro order, sub shipment or individual items
    - Can be deployed in matter of minutes remotely, developed on Hyperledger Sawtooth
    - borrowed concept of smart wallets and assigned sovereign identity to every choke point in the supply chain whether person or thing, every asset that passes through in supply chain inventory has a discreet identity as well–sets up myriad of interactions
    - Create digital twin of physical assets
    - Maps entire supply chain and procedures with customers and provide simple engagement with operations
- Upcoming Events
    - May 15th Hyperledger Meetup during NY Blockchain Week
    June 4th UN Blockchain for Impact Summit https://www.blockchainforimpact.org/
    June 10th Blockchain for Social Impact Conference, Use code IMPACT here for 50% discount/: https://www.eventbrite.com/e/blockchain-for-social-impact-coalition-conference-registration-57533317702

Action items

- ☑ Make changes based on discussion to survey Karen Ottoni. @Caine Smith and @bobbi@ledgeracademy.com please plan on how/when to release survey

Leftover Action items from April 30th meeting

- ☐ Ric Shreves & Marc Liberati: Expand on KYC/AML topic, make a slide -

- ☐ Alissa Worley Share digital identity deck for group to review and add to. Please upload to our Community Presentations page.

- ☐
