

Technical Working Group China

Description

The Technical Working Group China/ (TWG China, or TWGC) is a bridge between the global Hyperledger community, and the emerging technical user and contributor community in China and the greater China region, including Hong Kong and Taiwan.

Please see [Charter](#) for the full text of the charter.

Three liaisons are appointed by Linux foundation to help the work, including [Donald Liu\(\)](#) , [Min Yu\(\)](#) and [Scott Long\(\)](#) .

Scope

The Technical Working Group China/ is responsible for growing the Hyperledger developer community in China by responding to new user questions, helping with first-level triage of community-reported bugs or other issues, helping demonstrate to new developers how to report bugs or fire pull requests, and pointing motivated developers towards the project roadmaps and development initiatives at the global Hyperledger web sites. It should also make sure to expose new users to the broad range of projects at Hyperledger.

Meetings

All [Hyperledger meetings](#) are run covered by the following [Antitrust Policy](#).

Teleconference [bi-weekly meetings](#) on Wednesday 08~09 PM (GMT+8).

08~09

Welcome to join the next meeting using [Tencent meeting](#).

Working Areas

The team is working together in the following areas:

Areas	Description	Contacts
Development and Innovation	Help lead the development of hyperledger projects in code, tutorial, demos, with instructions on maillist, rocketchat, etc.	David Liu Yi Yuan
i18n and Education	Help lead the documentation writing/translation, seminar and education/trainings	Yang Cheng David Liu
Collaborations and Scenarios	Help encourage the collaborations between organizations and projects, with landing more scenarios /apps	Jessie Wang
Events Organization	Help instruct the events organization like meetup/hackathon	Scott Long Jay Guo
