

Add a Community Meeting to Your Calendar

There are two ways to add our community meetings to your personal calendar

Option 1: Start from the Hyperledger Wiki & Use for google calendars and Desktop Calendar (Outlook, iCal)

1. Visit the Hyperledger [Calendar of Public Meetings](#)
2. Find the next relevant community meeting you would like to attend and add to your calendar, click on it and you will see a link "copy to my calendar"
3. Click on that link and it will open a separate window or download the invite
4. NOTE: it will only download/add that one occurrence, if you would like it to repeat regularly, you must select "repeats biweekly", for example, and then hit save.

Option 2: Start from groups.io & Use for Desktop Calendars

1. Visit Hyperledger's Groups <https://lists.hyperledger.org/groups>
2. Find your community group in the list (note there are multiple pages). *For example*, <https://lists.hyperledger.org/g/capital-markets-sig>
3. Find "Calendar" within the group as the last item in the side bar on the left <https://lists.hyperledger.org/g/capital-markets-sig/calendar>
4. Scroll to the bottom of the calendar and click on button "Subscribe to Calendar"
5. A window will pop-up with a link you can paste in your browser <https://lists.hyperledger.org/g/capital-markets-sig/ics/4075450/1068246974/feed.ics>, which prompt a download of the calendar invite
6. NOTE: Make sure to check the cadence of the group's meetings as the download *may* be just for that occurrence and not a recurring invite, in which case you will need to select the cadence and then save
