Attendee

Please input your name before the meeting

- @Baohua Yang
- @tong li
- @Luke Chan
- @DuPeng
- [Dixing Xu](#)
- [xie ruitao](#)
- [Nancy Min](#)

Agenda&Minutes

- Hyperledger booth at consensus 2020 (check ur email);
- Maintainers please help review the [intern candidates](#);
- [Haitao Yue](#) will demo the setup workflow at next weekly meeting
 - [Baohua Yang](#) will prepare the new setup docs.
- [Haitao Yue Tong Li](#) help evaluate to migrate to materialUI from AntDesign framework;
 - [Tong Li](#) we are using Umijis 2.x now, and it's difficult to upgrade to the latest 3.0; Suggest we consider to move to MaterialUI+React (instead of Umijis+AntDesign+React), which is popular and good for mobile-first;
 - [Nancy Min](#) We've used materialUI and feel it's smooth;
 - [Haitao Yue](#) it needs time to switch to new UI framework; AntDesign is good in use and has efficient libs; Umijis is for packaging and routing;
 - [feng yang](#) If the functionalities are OK, we can continue with the existing solution; It should be no problem to switch the framework in future;
 - [Haitao Yue](#) and [Tong Li](#) have agreed with: [Haitao Yue](#) will try to upgrade Umijis first.
- UI development training session @Haitao & @Fengyang at next weekly meeting.
- [User dashboard API design spec](#) to review/update.
- [Haitao Yue](#) will design the new workflow for the user dashboard (support HLF v1.4 and HLF v2.0?)
