

Research WG

Mission

The focus of the Climate Research Working Group (CRWG) is to promote mutual understanding, collaborative activities, and interdisciplinary climate action through research. Therefore, we have decided to open a new Research Working Group to focus on studying DLT applications while targeting climate actions.

Scope

The current scope of Climate Research Working Group includes:

1. Working on ideas, proof of concepts, use cases and functional architectures of DLT's
2. Connecting academia to industrial towards building a Climate Research Consortium.
3. Sharing stories of successes, opportunities and challenges;
4. Promoting products and open sources of SIG
5. Writing research papers to submit to good places (Hyperledger Research, peer-review journals, conferences)

Please visit the Climate Action and Accounting [Resources Page](#) for past recordings, articles, and published papers.

Get Involved

This is an open source project and anyone is welcome to get involved and we will be happy to see you contribute.

1) Start by subscribing to the [Climate SIG mailing list](#) for updates and meeting notifications.

2) See our [How to Contribute](#) page for other ways how you could get involved.
