Add Dormant State to the Project Lifecycle

Status	RESOLVED
Blocking	
Outcome	Approved
Minutes Link	[2021 05 06 TSC Meeting Record](#)

Overview of Proposal

This proposal will add a Dormant state to the project lifecycle. Notable differences from existing project lifecycle include:

1. The addition of the Dormant state
2. The ability to now move backwards in the project lifecycle (from Dormant back to Incubation)

Formal Proposal(s)

Modify the project lifecycle to include the Dormant state, with the following state changes (changes **bolded**):

- Proposal Incubation
- Incubation Graduated or **Dormant** or Deprecated or End of Life
- Graduated **Dormant** or Deprecated or End of Life
- **Dormant Incubation or Deprecated or End of Life**
- Deprecated End of Life

? Unknown Attachment

The following description will be added to the [Project Lifecycle](#) document.

> *Dormant: Projects in the Dormant state are ones in which the normal functions are suspended or slowed down for a period of time. The TSC will make the decision as to whether a project will move to the Dormant state upon request. If Dormant projects become re-activated, they will re-enter the Incubation state even if they entered the Dormant state from Graduated state.*

Action Items

- ☑ Update tsc/project-lifecycle.md
