Description	Platform for building supply chain solutions that include distributed ledger components.

Hyperledger Grid is a platform for building supply chain solutions that include distributed ledger components. It includes a set of libraries, data models, and SDK to accelerate development for supply chain smart contracts and client interfaces. This project will accelerate the development of blockchain-based solutions to cross-industry supply chain problems

Documentation

The Hyperledger Grid documentation is available on the Grid website: Hyperledger Grid Documentation

Overview Slides

Brief deck explaining Hyperledger Grid and near term work activities and priorities. (Last updated June 2019.)

Project Management

Hyperledger Grid uses JIRA. For more information, see Hyperledger Grid Issue Tracking
